

Instantaneous Gas Water Heaters

At Gas Terminalling, we focus on helping people enjoy everyday life, be it in the home, at work or for leisure. With Bosch's Instantaneous Gas (or Tankless) Water Heaters, we add convenience and a touch of luxury to using energy.

Live fully.....get yourself into some hot water!!!

At home (or at the gymnasium), gone are the days when you have to wait to take a hot bath or shower. Thanks to Bosch, you get hot water where you want, when you want!

Work Smarter....."safe predictable hot water - all day, everyday"

At the office, factory, hospital or hotel, our tankless water heaters cut energy usage by as much as 70%, whilst providing a continuous and unlimited supply of

hot water. They also reduce the health risk associated with storing large quantities of lukewarm water (a concern for hospitals, hotels etc.)

Welcome to Reliability and Comfort!

Hot Water the Traditional Way

Storage systems, by virtue of their design are unable to cope with modern hot water demand, as the recovery times are often longer than the period of use. This poses a problem for restaurants and hotels, which require heavy loads of hot water at intermittent times of the day.

What is a Tankless Water Heater?

STOP heating and reheating the same tank of water; only heat water when you need it. Showers can be run directly from the units whilst maintaining the chosen temperature. Because the units are extremely efficient, they can be run from a **Lite Gas®** cylinder.

Tankless Water Heater Applications

Bosch History and Experience

Bosch has been delivering the most reliable and efficient hot water appliances to fit the lifestyles of today's modern households. Pioneering continuous flow of water heating in the late 1800's, Bosch has secured a name synonymous with Quality and Innovation that continues to drive the company today. As the winner of the 2009 Green Plumbers product of the year, Gas Terminalling is proud to introduce Bosch tankless water heaters to Nigeria.
