

GAS Generators for POWER

Need power? Then to turn to gas! It has never been easier or cheaper to change to gas for power needs.

"live fully" Reduce Fuel Costs by 30-40%

At HOME, in the OFFICE, or at PLAY, keeping the power on does not have to cost you an arm and a leg. With GAS generators, you can continue

to enjoy electricity at a fraction of the cost of diesel units. We supply, install and commission gas systems (generators, gas tanks, and associated equipment), which means that all you have to do is simply SWITCH ON!

Telecomms Power..... "Work Smarter"

Communication, particularly cellular technology, is essential to modern day business. Providing power to keep our communication systems up and running going is, therefore, very key. Asiko's GAS generators usher in a new power solution for cell sites. From the outside, our GAS units appear no different from diesel generators. However, here the similarity ends. They provide SAFE, ROBUST, CHEAP, and CLEAN energy without relying on the epileptic national grid.

Available Sizes

Small Scale Generators suitable for home, commercial or small industrial use are available in the following sizes:

Model Number	Rating
TG20	15 kVA
TG30	25 kVA
TG40	37.5 kVA
TG50	50 kVA
TG80	75 kVA
TG100	100 kVA

About Taylor Power Systems

Taylor Power Systems manufactures industrial proven dual fuelled natural gas/LP Gas generators, suitable for a wide range of applications. Taylor's generators, available through Asiko, are backed by a parts and distribution network that is second to none. Today, Taylor Power Systems is one of America's premier generator manufacturers of industrial, commercial, agricultural, and residential generators.

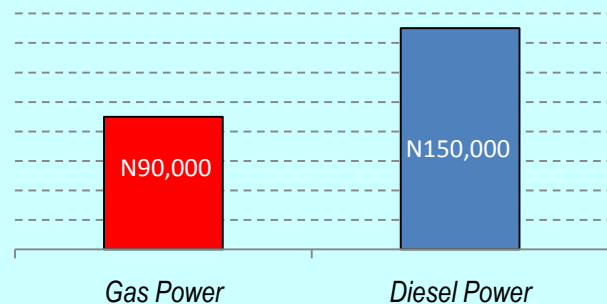

Switch to gas for engines with a superior build quality.

Advantages of GAS POWER

Advantages of Asiko's Gas-to-Power systems are:

- Save money compare with diesel (see chart below for average monthly savings for a typical site)
- Clean burning; extremely useful in built up areas
- Lower maintenance costs as fuel is cleaner
- Reliable performance in remote environments
- Eliminates diesel theft!
- General Motors (GM) engines so parts are readily available.
- Continuous or Prime Power operation!
